

The Changing UK Landscape and its impact on international families

Proposed changes, likely outcomes and opportunities

The UK “Res Non-Dom” regime was the original regime designed to attract foreign investors to the country that has been copied in multiple countries and has successfully attracted many wealthy individuals to live in the UK over the decades.

However, in the Spring Budget in March 2024, the death knell was struck for this basis of taxation. Against a turbulent backdrop, what are the key issues that international families, businesses and family offices should be considering?

We will review the proposed changes and the likely outcomes and planning opportunities arising for clients to consider.
